

HITRUST CSF® v11.5.0 Summary of Changes

Version 11.5.0

HITRUST is committed to keeping the HITRUST CSF current to meet the needs of organizations by regularly updating the HITRUST CSF to integrate and normalize industry standards, requirements, and other authoritative sources.

Proactively updating the HITRUST CSF framework control library with the addition of several key authoritative sources is an important part of the HITRUST cyber threat-adaptive approach to keep the framework relevant, up-to-date, and reduce risk. In addition, the power of AI in the HITRUST CSF development toolkit enables adding and mapping new authoritative sources faster and more accurately than ever.

Benefits of Adding Authoritative Sources to the HITRUST CSF

- To remain current with evolving industry standards and regulations
- To keep the HITRUST CSF comprehensive so it meets multiple organizational needs
- To include and harmonize emerging standards and mappings to stay ahead of cyber threats
- To satisfy market demand for additional HITRUST Insights Reports

The HITRUST CSF v11.5.0 release contains the following enhancements:

Authoritative Source updates:

- Added Abu Dhabi Healthcare Information and Cyber Security (ADHICS) mapping and selectable Compliance Factor, "Abu Dhabi Healthcare Information and Cyber Security Standard (ADHICS)"
- Added Cyber Security Act of Singapore mapping and selectable Compliance Factor, "Cybersecurity Act 2018 (Singapore)"
- Added Network and Information Security (NIS) Directive mapping and selectable Compliance Factor, "Network and Information Security (NIS) Directive"
- Added NY Department of Health (DoH) Title 10 NYCRR Section 405.46 mapping and selectable Compliance Factor, "NY DoH Title 10 Section 405.46"
- Added Singapore Monetary Authority of Singapore (MAS) Notice on Cyber Hygiene mapping and selectable Compliance Factor, "Singapore MAS Notice on Cyber Hygiene"
- Added Strategies to Mitigate Cybersecurity Incidents (Australia) mapping and selectable Compliance Factor, "Strategies to Mitigate Cybersecurity Incidents (Australia)"
- Added Texas Identity Theft Enforcement and Protection Act, Chapter 521 of the Texas Business and Commerce Code mapping and selectable Compliance Factor, "Texas Business and Commerce Code Chapter 521"

- Added UK Guidelines for Secure AI system development mapping and selectable Compliance Factor, "UK Guidelines for Secure AI System Development"
- GovRAMP Readiness mapping and selectable Compliance Factor, "GovRAMP Readiness"
- Refreshed COBIT mapping and selectable Compliance Factor, "COBIT 2019"

Additional Information:

- Added selectable Compliance Factor, "NY DOH System Security Plan v5 Critical Controls Attestation Overlay"
- The existing StateRAMP factor has been renamed "GovRAMP" consistent with the organization's rebranding.
