

## Bridging Compliance Gaps with Clarity and Confidence

HITRUST Insights Reports are powerful tools designed to translate HITRUST validated assessment results into the language of specific standards, regulations, or guidelines. By providing greater transparency and targeted communication, these reports act as a bridge between HITRUST CSF assessments and the unique needs of stakeholders, enabling organizations to streamline compliance efforts, build trust, and improve efficiency.

## The Challenges of Stakeholder Alignment and Transparency

Organizations pursuing HITRUST certification often face significant challenges that can hinder their compliance efforts. Stakeholder misalignment arises when some stakeholders demand adherence to specific standards other than the HITRUST CSF due to unfamiliarity with its comprehensive framework. Addressing these demands through custom assessments or parallel compliance programs often leads to wasted time and resources. Additionally, transparency gaps create further complications. While adding authoritative sources, such as HIPAA, to a HITRUST assessment may seem helpful, it doesn't always provide clarity on which parts of the source are addressed. This ambiguity can result in false assumptions about achieving full compliance, leading to further risk and inefficiencies.

## HITRUST Insights Reports: A Targeted Solution for Compliance Challenges

HITRUST Insights Reports provide an innovative solution to address the challenges of stakeholder misalignment and transparency gaps. These optional tools translate the results of HITRUST validated assessments into the specific language of other standards, regulations, or guidelines, ensuring stakeholders can easily understand and align with the findings. Additionally, they enhance transparency by clearly identifying which parts of an authoritative source, such as HIPAA or other frameworks, are addressed by the tailored assessment. This dual functionality helps streamline communication, reduce confusion, and build confidence in compliance efforts.

### Key Features

- |   |                               |   |
|---|-------------------------------|---|
| 1 | <b>Compliance Translation</b> | Easily translate HITRUST assessment results into the specific language and requirements of various standards, ensuring clear communication with stakeholders. |
| 2 | <b>Tailored Reporting</b>     | Generate Insights Reports complete with scorecards and cross-references to HITRUST controls, providing transparency and a comprehensive view of compliance.   |
| 3 | <b>Certified Assurance</b>    | Results are validated by an independent third party and certified by HITRUST ensure credibility and trust in your compliance efforts.                         |
| 4 | <b>Guided Implementation</b>  | Benefit from HITRUST's expert guidance on leveraging Insights Reports to effectively address stakeholder needs.   |

# How HITRUST Insights Reports Elevate Your Compliance Strategy

HITRUST Insights Reports are transformative tools designed to provide organizations with clarity and flexibility in demonstrating compliance across multiple frameworks. Here's how they work:

- **Customization Through Compliance Factors:** Organizations start by adding specific compliance factors to their HITRUST assessment, tailoring it with control requirements relevant to the standards, regulations, or guidelines they need to address.
- **Validation and Certification:** Once the tailored assessment is complete, HITRUST validates and certifies the results, ensuring that the customized controls meet the rigorous standards of the HITRUST CSF.
- **Generation of Insights Reports:** Organizations can then produce Insights Reports to enhance stakeholder understanding. These reports:
  - Translate HITRUST assessment results into the language and context of the chosen standard (e.g., HIPAA, GovRAMP, or other frameworks).
  - Include detailed scorecards and cross-references that map back to HITRUST controls, providing a clear and transparent view of how compliance requirements are met.
- **Guidance for Stakeholder Engagement:** HITRUST offers expert guidance on how to effectively use Insights Reports to communicate results with stakeholders, ensuring alignment and clarity in compliance discussions.

## It's essential to understand what Insights Reports are not:

- They are not forward-looking certifications that provide guarantees about future compliance.
- They do not serve as a replacement for HITRUST CSF assessments, but rather as a complementary tool to maximize the value of HITRUST certification.

By bridging the gap between HITRUST's comprehensive framework and other compliance requirements, Insights Reports empower organizations to streamline communication, enhance transparency, and optimize their compliance strategies.

## Why Choose HITRUST?

For over 17 years, HITRUST has developed reliable assurance mechanisms that are measurable, quantifiable, and proven. Our methodologies, built around a harmonized framework of over 50 authoritative sources – including NIST, ISO, and PCI – incorporate relevant, implementable control specifications that provide organizations with the assurance they need to protect their systems. Our flexible offerings are designed to be accessible, scalable, and suitable for organizations of any size, from small startups to large enterprises. With a centralized review process, third-party independent testing, and gold-standard certifications, HITRUST is the only organization that provides the level of reliability, consistency, and thoroughness required to secure AI systems today.
