

REDUCE VENDOR RISK AND ENHANCE CYBERSECURITY TPRM WITH HITRUST

Managing third-party risk is an overwhelming challenge. Increasing number of vendors, shrinking budgets, shifting priorities, and limited expertise can not only put your data and reputation at risk but also disrupt business continuity.

Enter HITRUST.

HITRUST makes TPRM scalable and effective, providing the framework, automation, and proven expertise to reduce risk and protect your business.

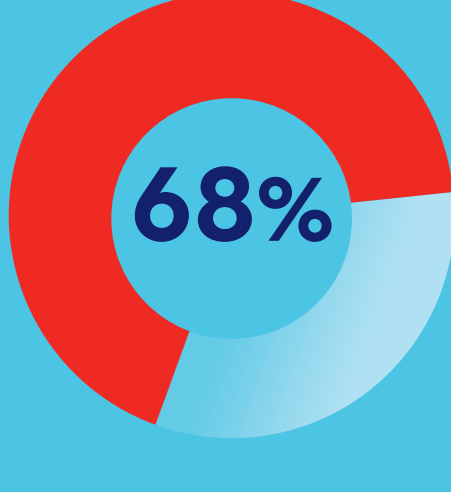

Third-party breaches are surging. Is your defense strong?

Average cost of a data breach in the U.S.¹

HITRUST

Most organizations are doing TPRM wrong. Are you one of them?

✗ High volume of vendors makes security assessments overwhelming.

✗ Lack of standardization offers unreliable, inconsistent, and incomplete results.

✗ Limited follow-through on remediation leaves risks unaddressed.

✗ Manual processes make TPRM expensive, slow, and ineffective.

HITRUST

HITRUST is proven to reduce risk. Are you secure or just checking boxes?

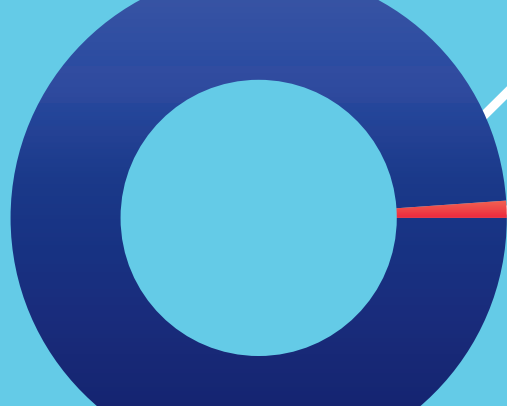

60+

HITRUST harmonizes over 60 global standards and continuously updates its framework.

HITRUST-certified environments stay breach-free.

99.41%

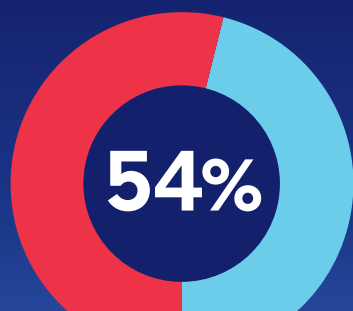

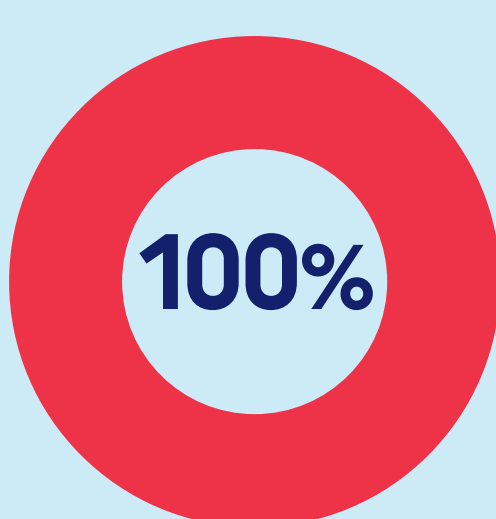

No Reported Security Breach

0.59%
