

# What Are the Key Benefits of a HITRUST MyCSF Subscription?

1

## Reduces overall assessment management costs

With a HITRUST MyCSF® (“MyCSF”) subscription, an organization can save both time and money by maintaining data and Corrective Action Plans (CAPs) from assessments, significantly reducing data entry by internal and external resources when performing future assessments.

2

## Provides continuous visibility of risk posture

Organizations can maintain a full view of their risk posture throughout the assessment lifecycle, allowing them to continuously assess over time, reacting to updates to the HITRUST CSF® as well as threats to their environment.

## Key Features of a MyCSF Subscription:

### DATA RETENTION

- Easily produce future readiness or validated assessments
- Interim assessments auto-populate 90 days prior to their due date, free of charge
- Eliminates data re-entry, saving valuable time

### EFFICIENCY OF REPORTING

- Assess once against up to 44 authoritative sources and obtain a single report with the ability to provide assurances to multiple requesting parties
- Produce scorecards to demonstrate compliance posture with any international, federal, or state regulations or standards that are in-scope for an assessment

### ADVANCED ANALYTICS & BENCHMARKING

- Streamlined analytics and reporting for all levels of management
- Custom Analytic Reports, Benchmarking, and Dashboards

### INTERNAL & EXTERNAL INHERITANCE

- Organizations can assess a system once and leverage the result in subsequent assessments that cover the same or new systems
- Organizations can leverage Service Provider assessments through external inheritance in lieu of testing – saving their assessor time and costs

### LEVERAGE API WITH NATIVE TOOLSETS

- Eliminate redundant toolsets by integrating native tools with MyCSF to facilitate information exchange
- Allow your users to continue working in their familiar tools – no need to learn another tool

### STRATEGIC DECISIONS

- Organizations can use MyCSF to understand current risk and compliance postures
- Easily view gaps in your information protection program, then prioritize and keep track of remediation efforts

*Additionally, each organization is assigned a dedicated Customer Success Manager to assist with any HITRUST needs.*
